Product Marketing Announcement

Brazilian Portuguese and Bulgarian Languages now available for Epicor 9

Product Marketing is pleased to announce the general availability of Brazilian Portuguese and Bulgarian languages, taking the number of languages released to 33.

With this announcement Brazilian Portuguese and Bulgarian are now generally available as languages for Epicor 9 and join the list of already announced languages: Arabic, Chinese (Simplified), Chinese (Traditional), Czech, Danish, Dutch, English (US), English (UK), Estonian, Finnish, French (Canadian), French (France), German, Greek, Hungarian, Italian, Japanese, Korean, Latvian, Lithuanian, Norwegian, Polish, Romanian, Russian, Slovak, Spanish (Latin), Spanish (Spain), Swedish, Thai, Ukrainian and Vietnamese. Epicor continues to work on additional translations and plans to release additional languages during the remainder of the current calendar year.

Language v Country Specific Functionality

Users interact with Epicor 9 via screens that are best viewed in a language they are familiar with. The same language (for example English (UK) or Spanish) may be used in different countries. For centralized installations the language of the operator may have no relation to the language natively spoken in the location being supported. In many locations around the world the core Epicor 9 functionality is sufficient to enable clients to implement solutions that can be used to comply with local requirements, however in some locations additional Country Specific Functionality (CSF) packs may be required either to address critical local needs or support local best practices. Epicor 9 includes both Language Packs and CSF Packs as OPTIONS to extend the reach of the solution.

IMPORTANT

The availability of a Language does not imply the release of a corresponding CSF Pack and vice-versa.

Please see separate release announcements for the availability of CSF Packs or consult Product Marketing or Product Management to discuss CSF Pack needs and availability.

Packaging and Availability

Released languages are available for immediate sale and download. The languages may be ordered on disk through normal channels or downloaded via the secure download facility within EPICweb via this link.

All installations of Epicor 9 include a primary language without charge in addition to English (US). Please consult regional price lists for local currencies.
